19:05 – 19:10: Closing Remarks ICorr.

**The Talk:**

**Cooling Water Treatment and its impact on Asset Integrity Management**

**Synopsis:**

Understanding what corrosion mechanisms can be found within Cooling Water Systems, what treatments are applied to mitigate these, and also explore a real example of a corrosion issue within INEOS KG Cooling system and the approach taken to help resolve and mitigate this.

## **Biography:** Lisa Anne Sweeney

Lisa is the UK Scotland Area Manager & UK&I HPI&CPI Technical Sales Manager for Veolia Water Technologies and Solutions with 17 years of water and process industry experience. Previously working in semiconductor industry as a process engineer. During my time working for Veolia Water Technologies & Solutions (previously GE water and Process Technologies, SUEZ Water and technologies) I have predominately worked within the Heavy Industry Refineries/Chemical plants, supporting water and process systems to ensure asset integrity with our products and solutions.
