The Industrial Problem – Corrosion Management

Need

When and Where is the risk of corrosion?

Pain

Reactive corrosion management is **costly** and is a **safety risk**

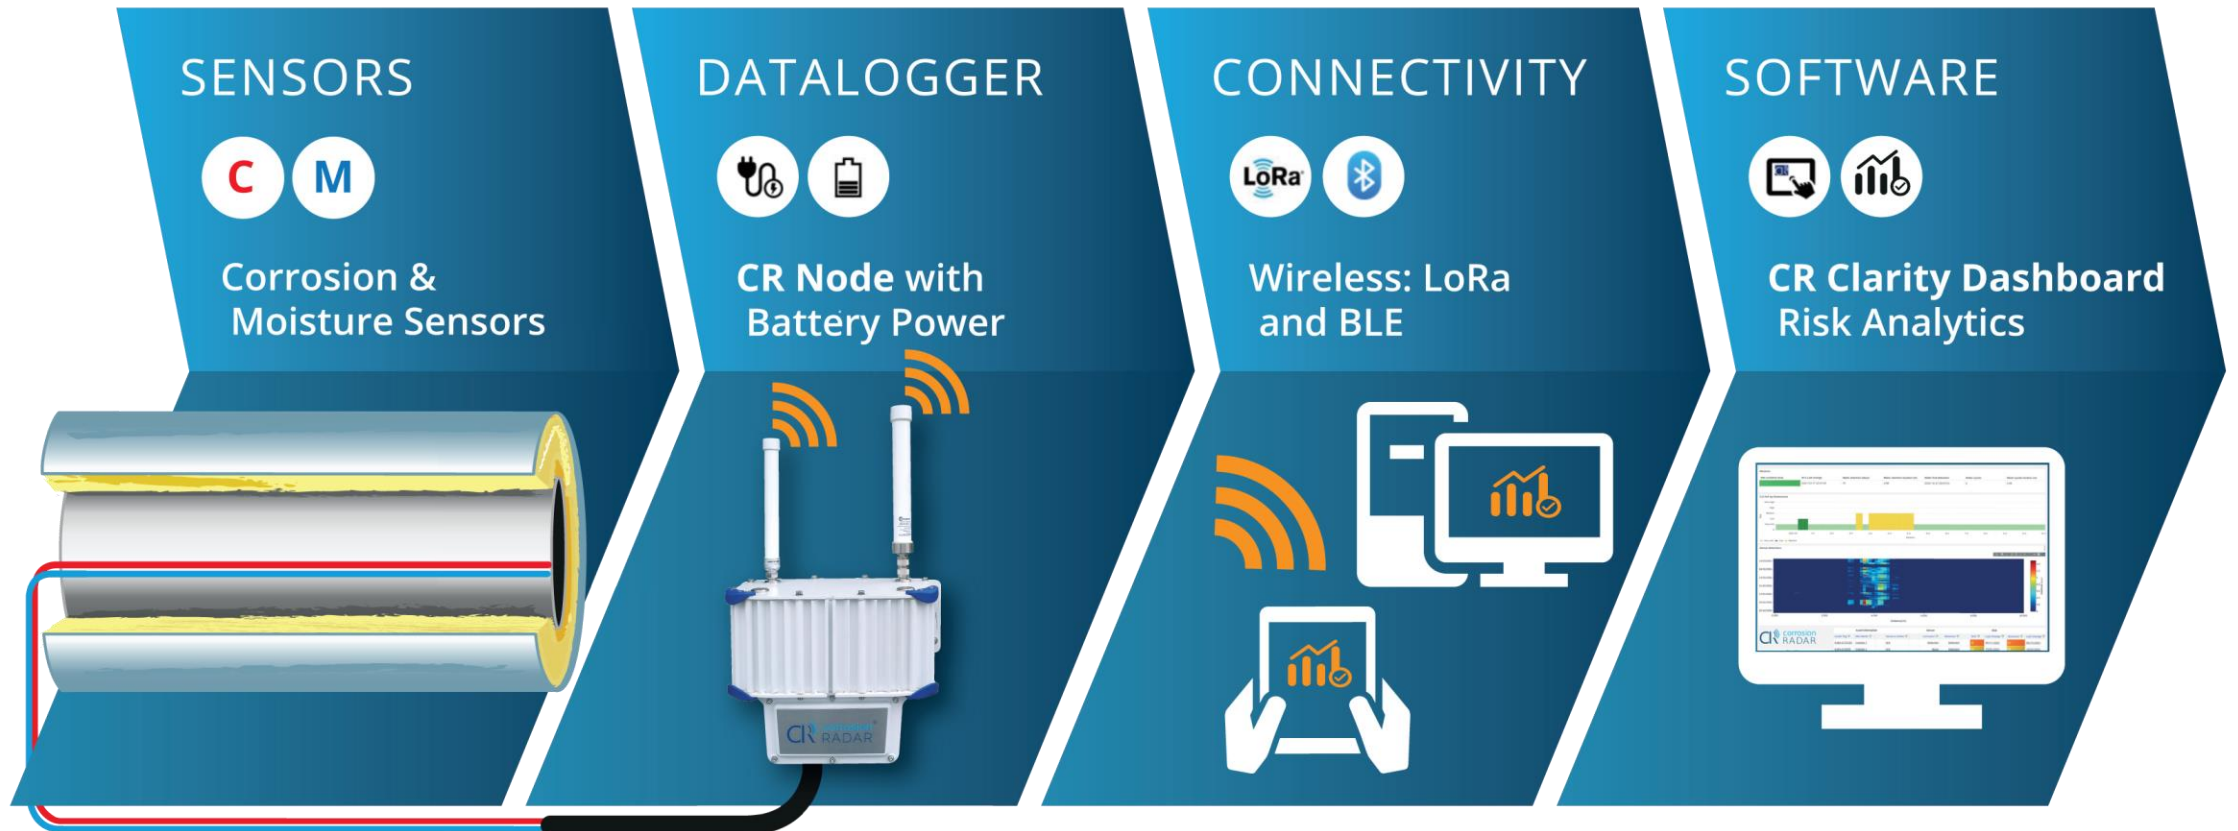

Opportunity

Predictive corrosion monitoring leads to **savings** and **safer operations**

CUI Monitoring

Typical CUI Monitoring System Architecture

REDUCE RISK

Improve Inspection Effectiveness -

PREDICT WHEN & WHERE TO ACT

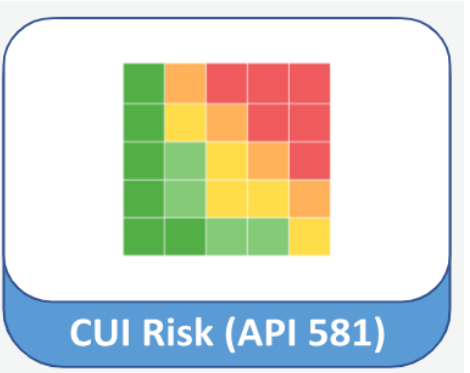

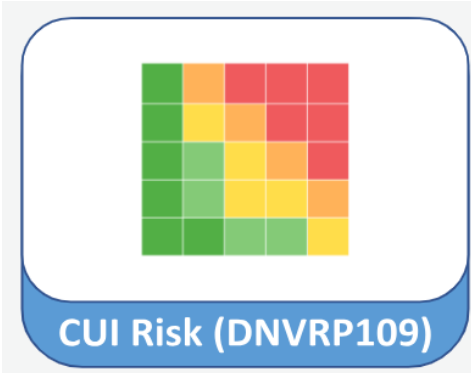

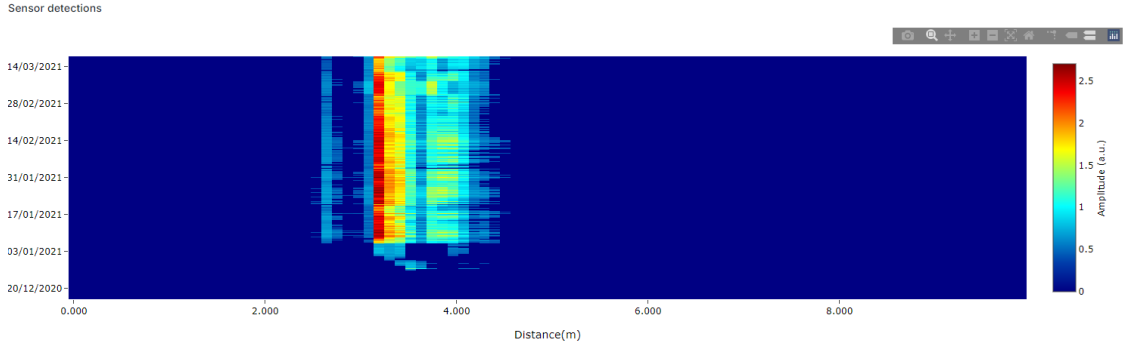

with CR Clarity Risk Analytics...

YOUR PATHWAY TO PREDICTIVE CORROSION MANAGEMENT

Reduce Cost and Risk

CUI Monitoring Deployments

CUI MONITORING HAS SEVERAL APPLICATIONS GLOBALLY

Benefits of CUI Monitoring

1. Predictive rather than reactive approach to CUI

2. Quality assurance on insulation & cladding

3. Optimize inspection costs and decrease inspection frequency

4. Optimize Turnaround scope with predictive method

5. Reduce risk of CUI associated LOPC
